September 26th, 2019

Park on the East side of the Building. 405 East Hamlin St. Please use the hinder center entrance between the building and the pool

Safe Ice Resurfacer Operation (SIRO)

The Safe Ice Resurfacer Operation program is an efficient, cost effective method for skating facilities to provide initial, standardized education to individuals that will be required to operate their ice resurfacer. This is the perfect class to introduce new employees and volunteers to the ice resurfacer while enhancing the manufacturer’s materials that arrived with the original purchase of the ice resurfacer. Safety is the main topic in the SIRO program and should be the top priority when educating staff and volunteer operators.

Thursday Agenda
